Question q (split on . ? !): embed; retrieve top-k SVOA facts ($k = 100$) and up to 10 structural items
Facts: drop hypothetical, rank by SDH $\times$ sim(t, q), greedy pack under B
Structure: keep relevant, eligible items; rank by $\sigma(e, q)$; pack the top 3 first (a list may be truncated)
Fact-only context (Eq. (3) packing)
no
Anything packed?
yes
Suppress same-document facts and facts the structure covers; fill the rest of B
Enforce hard ceiling $B \rightarrow$ render $\rightarrow$ grounded prompt $\rightarrow$ local LLM
